

EMPOWERING LEARNERS

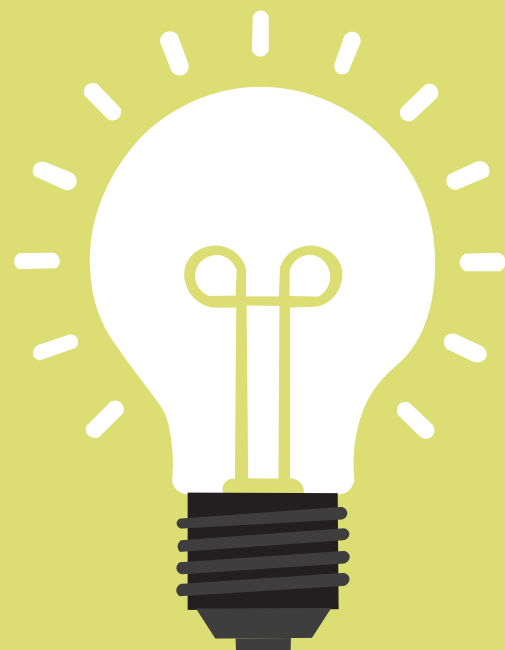

This 5-session programme is designed to enable teaching assistants to support children's learning more confidently at all stages of their learning journey. These virtual sessions will focus on fostering independence in children rather than creating a sense of 'learned helplessness' for pupils who work in guided group. During the sessions, staff will be supported to evaluate their own practice and identify priorities for themselves and the children they work with, taking ownership of their development and identifying ways in which they can continue to progress.

For the fifth session, participants will have the opportunity to meet in-person at an Inspire Partnership school to observe an intervention or guided group on empowering pupils to be independent using the five stages of independence.

Programme dates:

- 22/02** Relationships
- 22/03** Child Development
- 26/04** Communication
- 24/05** Positive Behaviour
- 21/06** Scaffolding and The Five Stages of Independence

All virtual sessions will take place online via Zoom
